Arsenic: A Bibliography of Recent Literature

Technical Review EPS 3-NW-75-2
Northwest Region

Rosenberg

ENVIRONMENTAL PROTECTION SERVICE REPORT SERIES

Surveillance reports present the results of monitoring programs carried out by or for the Environmental Protection Service. Some of these reports will be published on a regular basis.

Other categories in the EPS series include such groups as Regulations, Codes and Protocols, Technology Development, Briefs and Submissions to Public Inquiries, Environmental Impacts and Assessment, Policy and Planning and Economic and Technical Reviews.

Inquiries pertaining to EPS Reports should be directed to the Environmental Protection Service, Department of the Environment, P.O. Box 2310, Yellowknife, N.W.T., XOE 1H0, or to the Environmental Protection Service, Department of the Environment, Room 1023, 10025 Jasper Ave., Edmonton, Alberta, T5J 2X9, or to the Environmental Protection Service, Department of the Environment, Ottawa, Ontario, KIA OH3.

ARSENIC: A BIBLIOGRAPHY OF RECENT LITERATURE

ABSTRACT

This bibliography of the recent literature on Arsenic and its compounds has been sub-divided into eight sections for easier reference. A total of 1,552 citations are listed alphabetically by author.

1. INTRODUCTION

In 1974 the Departments of the Environment and of Health and Welfare began a comprehensive review of the extent and nature of pollution from Arsenic and its compounds near Yellowknife, N.W.T.

This bibliography was prepared in order to assist the several researchers who are to investigate the aspects of arsenical pollution affecting the air, water, soils sediments and biota (including humans) near Yellowknife. In order to facilitate easier access to the many papers and texts cited herein, the bibliography has been subdivided into topic headings which roughly correspond to the broad areas of concern to be investigated. Some duplication of citations of papers between categories was allowed, since many papers contained data with wider applications than allowed for by the arbitrary categorization.

The bibliography consists of citations of recent literature with Arsenic which were obtained from references on hand and also from computer searches by N.R.C. of the following abstracts: Chemical Abstracts (June 1973 to Sept. 1974), Biological Abstracts (Jan. 1973 to Sept. 1974), Pollution Abstracts (1970 to Sept. 1974), Air Pollution Abstracts (Dec. 1971 to 1975), Oceanic Abstracts (1970 to June 1974), Health Effects of Environmental Pollutants (abstracts)(1972 to 1975), Environment (1972 to 1975), N.L.M. (Medline Taxline Retrieval (1950 to 1974), Medlars II, Medline and Backfile (1969 to 1971), and the Environmental Data Base of WATDOC (maintained by the Inland Waters Directorate of Environment Canada).

ACKNOWLEDGMENTS

The assistance of Ms. N. Edson of the N.R.C. Institute for Scientific and Technical Information in Ottawa, of Dr. R. Roberts of N.R.C. Ottawa for his advice and assistance, and of Ms. M. Laughton, E.P.S. Ottawa, are gratefully acknowledged.

A special thanks is due to Ms. J. Burnford who worked so diligently in the assembly and typing of this report.

The co-operation of Fisheries and Marine Service, Yellowknife, by way of secretarial and operational support in the assembly of this report, was most helpful.

Although numerous errors of transcription were located and corrected, the author accepts sole responsibility for those which were not.
