Mr. R.J.C. Tait,
Mill Superintendent,
Giant Yellowknife Gold Mines Ltd.,
Yellowknife, N.W.T.

Dear Bob:

Your samples and letter both arrived today. Analyses will be completed tomorrow or Thursday.

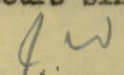

When we sent you our samples we followed the usual procedure in referee work and did not include their analyses. These were as follows:

Sample No.	
1	4.50 ppm As
2	1.40 " "
3	0.03 " "
4	6.00 " "

These cover the range of arsenic levels which we have been finding in Yellowknife tap water and Yellowknife lakes.

If you have used up the samples in trying to find the proper aliquot to take we can send you some more.

Yours sincerely,

J.P. Windish
Industrial Hygienist.
