August 14, 1956.

Mr. Kurt Raht,
Senior Research Engineer,
Consolidated Mining and Smelting Company
of Canada Limited,
Kimberley, B.C.

Dear Mr. Raht:

While I was in Yellowknife this summer I took stack samples at Con over the period July 3rd to July 12th inclusive. So that I may calculate the collection efficiency of the impinger will you please send me figures showing the tons of arsenic sent to it during this time or the data necessary to calculate this.

Yours very truly,

J.P.W.
