January 6th, 1955.

Samples for Arsenic Analyses from Yellowknife.

When Mr. Windish was in Yellowknife he collected 23 water, 20 snow, 27 grass, 1 cabbage, 1 milk and 3 electrostatic precipitator samples. Will you please analyse all these samples for arsenic.

In accordance with the arrangements you made with Mr. Windish will you then please send the residues of the grass and snow samples to the Bureau of Mines.
