

Notes of a Phone Call
To W. A. Moore
Re Arsenic Upgrading
April 4, 1979

We went over P. J. Raleigh's memo concerning the arsenic upgrading facility. Moore felt it looked okay.

I told him that Raleigh suggested we set up some sort of organization to get the work done. WAM feels we should get a man in from Sudbury as Kent and Connel have a lot of other things to do. He seemed anxious to get things going. I mentioned that Falconbridge is looking at the possibility of using Hatch and Associates as consultants on the project if Falconbridge Engineering is too tied up.

I told him that I would be meeting those involved in the project on April 6 to tie up any loose ends. WAM said he would be confined to hospital and not able to make the meeting.

D. J. Emery
