Notes of a Phone Call
To P. J. Raleigh
Re HSA Reactor
December 14, 1979

During my conversation with Raleigh on December 14th concerning Salsigne, I also talked to him about the HSA reactor.

Raleigh feels that we should be getting at least some preliminary reports from them as to what they can achieve or what they have done already for us. He asked whether we had received any reports of this nature.

He had intended to meet with them next Wednesday but will cancel this meeting if we are prepared to live with the revised contract that we now have.

I told him I would contact WAM to advise him of this and that I would get back to him if it looked like we wanted to go with the contract as presently worded.
