

Phone Call from P. J. Raleigh

Aug 27/80

He had been advised by Heit that there are some permit problems re trucking of B_2O_3 . Asked who to contact, my reply was Don Belling.

Told him I would get W. A. Moore to phone for advice on how they should go.

I expressed my concern about finding a white elephant if we can't locate materials. Discussed contract - not likely that we would be covered if site & road not built & completion because of permit problems.

W

Passed along on to W. A. M. also remarks of Bob Sartore re meeting & outcome on transport of hazardous materials. Norm McBlissen is representing Don Belling at meeting. Asked W. A. M. to phone P. J. R.
