Dear Mr. Zeraldo:

We would like to reiterate our interest in obtaining an additional supply for Arsenic Trioxide at approximately 98% purity level. We appreciate the submittal of your analysis November 7, 1978, however, the material as provided is not acceptable. Our minimum standard would be 95% to 96% purity.

Our annual usage is approximately one million pounds and has been growing over the years. Water borne salts have historically shown excellent growth and we anticipate a continuation of the trend.

Any information regarding your ability to provide Arsenic Trioxide should be forwarded to the writer at the letterhead address.

We appreciate your interest and look forward to hearing from you at your earliest convenience.

Very truly yours,
