

Notes of a meeting held on March 29th in Pat Raleigh's office.

Present: Pat Raleigh
Howie Evans
Tony Seth - later
DJE

The meeting was called to discuss the Koppers secrecy agreement that they want us to sign.

I indicated I wasn't too happy with the agreement, particularly the recitals which indicated they have a proprietary process which evidently is really not the case.

There was considerable discussion on this and Howie Evans and later Tony Seth also agreed that the document would have to be rewritten. The feeling at the meeting was that the document should be a mutual confidential agreement and that there should not be any indication at all of a proprietary process belonging to Koppers as they really haven't developed. Also whatever is known to Giant (Falconbridge) should be indicated in the agreement. Tony Seth is to redraft the document after he gets information from Raleigh as to the technical expertise we have in the field of the amonia leach process.
