**MESSAGE:**

Dave, attached is an extensive list of CEM system vendors in North America.

For stack testing I only looked for companies located in Alberta because I though (and found previously) they would submit the most cost effective bids due to lower travel costs. Entech I already told you about. The other Alberta firms capable of doing the work that I was able to identify were:

Bovar Concord	Darcy Morgan	(403) 291-3140
HBT Agra	Daryl Zander	(403) 436-2152
Chemex	Kevin Smith	(403) 465-9877

It is my understanding that Bovar/Concord and Entech both have Internal capability to design CEM systems, the other two companies may have to go outside to sub-contract that expertise.

Also, we have released the dispersion modelling report. You may have already started attracting some media attention. Have a good weekend.

*Jim*
