

To D. R. DeLaporte. c.c. A.K.C., H.E.P.

Date December 2, 1971.

From D. J. Emery.

Ref.

Subject COTTRELL AND BAGHOUSE LOSSES.

Attached is a copy of a memo issued by H. E. Pawson re the dust loss problem. Bob McRobert did a very good job and losses have now been substantially reduced as indicated by the table attached.

Five sections in the Baghouse have been completely overhauled this year -- three were done in the last two months. Two units of the Cottrell have also been overhauled (rappers, solenoids, rectifiers, some rods) and these are presently in service giving good results. The other two units will be gone over in 1972. Running of three units does not now appear required although we are keeping this option open.

We now feel to be on top of the problem and, barring any great slugs of Sb, intend to stay that way.
