Mill Superintendent

RE: 1989 ROASTER STACK TEST

Dear Mr. Halverson:

We have examined the results of your roaster stack test for arsenic emissions completed on October 11, 1989. We were pleased to see the low levels of arsenic measured during the test and encourage you to continue to operate the pollution control equipment in such a manner that these levels will be maintained.

Please let me know when you plan to conduct the test for 1990 because I would like to witness the test.

Yours truly

Ed Collins, P. Eng.
Senior Environmental Engineer
