

Notes of a Phone Call
To P.J. Raleigh (416) 863-7193
September 6, 1978

I called to inform him of the C.B.C. news item on the Yellowknife Station concerning prospective arsenic sales to Koppers. The report quoted a shipment in 45 gallon drums of arsenic about 2 weeks ago for test purposes re treatment of wood. C.B.C. stated that the cans were improperly marked and were stopped in Alberta before being shipped on to the United States. W.A. Moore had been called by C.B.C. but had made no comment as no deal had been finalized. I also mentioned that W.A. Moore was quite upset about the fact that C.B.C. put the story over the air when he specifically asked them not to because of the possibility it might have of queering the deal.

Raleigh replied that he felt that Koppers might be looking for public opinion as to the shipment of arsenic so that it should not pose too much of a problem. He also felt that the announcement may queer the Con deal. He suggested that I write to let them know that we are still interested in their material.

After some discussion I suggested since he had been the one to contact them in the first place, he should write the letter.

Raleigh also felt that the Territorial Government should be contacted to see how the announcement affected their stance.

He advised that he has written to FMC to see if they are interested in our product.
