Notes of a Phone Call With P.J. Raleigh
September 18, 1978

We discussed his new version of the Gigerich letter and I approved sending of same.

He next stated that a secrecy agreement had been received from the HSA Reactor people and that he would be prepared to discuss this with me when I was next in Toronto.

He asked if information was available for the socio-economic aspect that L.S. Price was writing up re the Giant DPAT project. He thought we should be indicating what the benefits were for putting into production a medium-sized operation treating 500 tons per day of ore. Compare this with what it cost Giant to get started in the beginning.
