

NOTES OF PHONE CALL TO P.J. RALEIGH
December 5, 1978
Re Arsenic Sales

Raleigh stated that Marketing has a draft letter to go to Koppers which Engineering feels should be modified. He will telex the changes.

He mentioned the article given to me by W. A. Moore re restrictions on use of As_2O_3 in the U.S. was known about. He has discussed it with Koppers and they don't feel there's any real problem.

I mentioned that I had seen Geigerich of Cominco and he had asked about where we were with the research on their arsenic pond. Be Because of pressure from the Water Board they are coming out with a plan to have it covered starting next spring with something like 15 feet of tailings to press out the moisture. They will treat any effluent from the pond. I suggested that Raleigh phone Geigerich to get a little more on the plan and to let him know what we were up to.

In concluding the call he noted that Howard Bye hadn't called back on Monday but if there was anything he could do re Frenchy's Garage he would be please to help.
