SUBJECT: FILTER TESTING AT RPC

---

During our telephone conversation the other day, I told you that we were anticipating imminent Board approval of our WAROX project. Unfortunately, we did not get approval to proceed with the project as planned and there is no definite indication of when approval might be forthcoming.

We do expect that the project will eventually get the green light, however, and we would like to have the filtration testwork completed so that detailed engineering can be done without delay when this occurs.

I gather that your engineers now have a good idea of what is involved in pilot filter design and fabrication, through discussions with Ross Gilders of RPC. If you will provide us with a cost estimate for the necessary work, we will arrange to set up a budget and continue with plans to complete the testwork.

Thanks for your help.

Best regards

Kent Morton
