Dear Mr Fletcher,

BARBROOK : ARSENIC TRIOXIDE TREATMENT

Thank you for the information presented to us during our discussions on 14th November and your subsequent letter and brief report dated 22nd November.

You have certainly indicated potentially attractive processing routes and provided valuable marketing information; this is very much appreciated.

As far as future action is concerned (based on the current status of the Barbrook project), we shall be grateful if you could arrange for draft confidentiality agreements to be sent to us in respect of both the Allied Research and Koppers routes so that additional process information can be made available to us when required. It is, however, unlikely that any financial commitment can be made by us in the near future - depending on the outcome of our ongoing evaluation programme of the project.

Yours sincerely,

R J ORTLEPP
ACTING CHIEF CONSULTING METALLURGIST
