TORONTO, Ontario.
M4H 1A9

Dear Dr. Fitch:

Thank you for the April 7th letter on arsenic exposure,
which just arrived here on April 21st.

It came as a surprise to learn you had received that
particular Yellowknife report and had undertaken to review it,
because it was actually intended to deal only with an immediate
situation in 1975. We appreciate that such a field survey
report could not measure up to the rigid scrutiny usually
reserved for scientific publications, but are confident as to
the validity of the results.

Now that we are aware of your interest, we shall endeavour
to keep you informed of our work. We welcome the opportunity
to compare notes and discuss each other's work, and hope that
it can be done on a continuous and mutually beneficial basis.

Yours very truly,
