YOUR FILE - V/RÉFÉRENCE	
DATE	
April 29, 1975.	
REFER REPLY TO ENVOYER LA RÉPONSE À	TEL. NO. TEL.

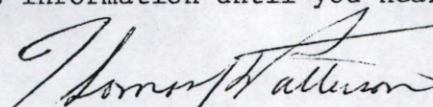

Enclosed are the results of the arsenic analyses of 700 hair samples and mercury analyses of 153 samples selected at random.

These tables include all 700 sample results in one compilation. It is suggested that you use only these data and discard the previously submitted partial results as there may be some slight differences as a result of corrections.

The additional hair samples which were selected and "washed" as per your request are now being analyzed and results will be forwarded as soon as available.

I realize the position you are in with regard to the interpretation and release of this information and am discussing its complications with Drs. Black and Hicks.

Dr. Black will probably contact you directly concerning this matter. Please do not release this information until you hear from him.

T. H. Patterson, M.D.

Encl.

c.c.: Dr. Black
Dr. Hicks ✓
