MANAGEMENT COMMITTEE MEETING

Dated: June 24, 1975.

2.8 Sewage Disposal for Yellowknife

Dr. Black reported that time seemed to have solved this problem. As background information, he reported that there was a conflict of opinion as to how this should be handled by the City of Yellowknife and also a conflict of opinion in our own Branch. There are two options: 1) to dump sewage into a lake (near the hotel) and 2) to dump it into a lake further away. Blasting is not possible because of solid rock there. Dr. Black stated he had obtained the best possible advice and had discussed all the possibilities with Dr. Colvill.

FINI.
