FROM: Chief, Industrial Health Laboratory.

DATE: March 8, 1951.

SUBJECT:

Storage of Arsenic -- Giant Yellowknife

PA

There is attached hereto a copy of a letter written by Mr. Muir on the matter of underground storage of dry arsenic trioxide. This letter indicates the very careful consideration which the company has given to the matter, and it is the kind of detailed approach which permits one to have confidence in the plan being considered. I feel certain that the manner in which we originally stressed the gravity of the Yellowknife situation is directly responsible for the importance which this company is now giving to the health side.
