YELLOWKNIFE  
N.W.T.

*confid.**P.A. 455-10-13*

September 12, 1951.

SEP 15 1951

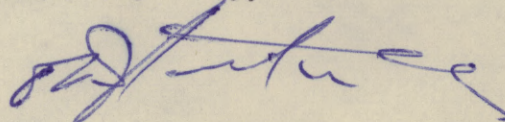

Dr. Kingsley Kay,  
Chief  
Industrial Health Laboratory,  
200-Kent Street,  
Ottawa, Ontario.

Dear Doctor Kay:

Thank you for your letter of August 29th. There have been no further reports of any illness due to As; and, as you know, routine urine specimens sent out have been consistently low. If Doctor Morris Katz intends to do a mass survey I believe we can supply the facilities I showed you.

*28*  
However, with the coming into operation of the Giant Cottrell plant this fall all danger should be over and I, personally, would not think the expense worthwhile.

Yours very truly,

O.L. Stanton M.D.

*It had been understood that the Cottrell would be completed and operating by Sept 1. I have sent a wire to check on the commencement date (10).*
