Mr. Kurt Raht
Consolidated Mining & Smelting Co. of Canada, Ltd.
Chapman Camp, B. C.

Dear Mr. Raht:

On June 30th, I sent to your attention at Chapman Camp six samples of water containing arsenic, made up in our laboratory ranging in concentration from 0.125 mg. arsenic (as As) to 12.5 mg. arsenic per litre.

I intend to analyse them at the first opportunity to check my method and would appreciate it if you could have them run with a view to seeing how the results compare.

Very truly yours,

J. L. Monkman
Chemist
