

200 Kent Street,  
Ottawa, Ontario,  
August 29th, 1951.

Dr. O.L. Stanton,  
Yellowknife,  
Northwest Territories.

Dear Doctor Stanton:

I felt it my place to drop you a line and mention that Dr. Charron did receive your letter of July 18th. He gave it to me so that I could peruse the data which you kindly supplied and I have been travelling a good deal and, therefore, on that account you did not receive a direct acknowledgment. I know I can speak for Dr. Charron in telling you how much we appreciated your co-operation in putting this data together and no doubt you will hear from him directly in regard to the survey which we discussed.

The intention was to secure the services of a Dr. Morris Katz who is presently with the Defence Research Board and who played a senior role in the investigations at Trail some years ago. These arrangements have been slow to complete but I expect we shall have definite word next week as to how the affair will be organized and if we can make a start this fall.

This will bring you up to date on the matter and afford me an opportunity to thank you for your courtesies in Yellowknife last July.

Yours very truly,

Kingsley Kay,  
Chief,  
Industrial Health Laboratory.
