JUL 20 1951

Dr. K. Kay,
Industrial Health Laboratory,
Department of National Health,
200 Kent Street,
Ottawa, Ontario.

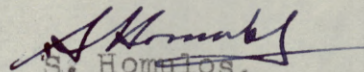

Dear Kingsley,

Enclosed herein is a draft copy
of a report on arsenic disposal.

The only comment I have to make
is that in the second last paragraph, we may be a little
strong in saying that as a last resort should underground
wet storage be adopted, I feel that by grouting, Negus
Mines can make as safe a storage or better than the Con
with their surface basin.

Please forward as soon as possible
containers for water collection.

Yours sincerely,

S. Homalos,
Mining Inspector.

Encl.
