Mr. P. N. Pitcher
Mine Superintendent
Giant Yellowknife Gold Mines Ltd.
Yellowknife, N. W. T.

Dear Mr. Pitcher:

In reviewing the results of analyses on water and vegetation samples submitted since the middle of June 1950, the question of sampling locations has arisen. The fact that the same numbers have been used for each group of samples seems to indicate that each number might refer to a definite sampling location. If this is so, would you kindly plot the locations referred to on a map and send it to us in order that we may tabulate the results accordingly.

If this practice has not been followed may we be advised of the location where each sample was taken?

Yours very truly,

Kingsley Kay
Chief
Industrial Health Laboratory
