200 Kent Street,
Ottawa, Ontario.

July 12th, 1954.

Dr. C. V. Marshall,
Chemical Laboratory,
Department of Agriculture,
79 Sussex Street,
Ottawa, Ontario.

Dear Dr. Marshall:

I am sending you herewith 15 samples of vegetation from Yellowknife, to be ground prior to analysis of arsenic, together with twelve mason jars to be used as containers for the ground material.

I expect that we will have, perhaps, ten more samples of the same material to be ground in the near future.

Your help is indeed appreciated.

Yours very truly,

J. L. Monkman.
