Mr. Steve Homulus,  
District Mining Inspector,  
Yellowknife, N.W.T.

Dear Steve:

It is expected that I will be in Yellowknife November 25th to take our regular samples. Do you think you could collect in the meantime, at least 20 gallon jars for snow samples? This is the type that we used to get from the mine cook-houses. I will also need 3 dozen 1-quart sealers, so will you see what is on hand and make up the supply to this amount.

Kindest regards.

Yours sincerely,

J. P. Windish.
