Dear Nick:

I wonder if you would be good enough to look over the enclosed list of names selected to furnish urine for test and let me know which of these will be available for urines in the months to come.

Dr. Kay feels that we should try to obtain several more samples in order to complete our data for report purposes, and if there are vacancies in the enclosed list we will have to fill in with new names.

I shall try to find time to write you a decent letter in the near future.

Yours very sincerely,

D.L. Henderson, M.D.,
Industrial Health Division.
