

OTTAWA, May 28th, 1954.

MEMORANDUM FOR FILE:

Re: - Yellowknife

This morning a meeting was held with Mr. K. Christie, Dr. D. L. Henderson and Mr. J. Windish at which a review of all available data on Yellowknife was made.

At this same meeting a proposed summer survey and stack sampling programme were outlined. Additionally Mr. Christie indicated that a request would be made for investigation of arsenic in the air of roaster buildings and collection buildings at Yellowknife.

A request of February 12 by Mr. Kurt Reht for elimination of winter lake sampling was reviewed. It was agreed that sampling of Frame Lake, Rat Lake and one point on Ken Lake might be dropped during frozen conditions.

In the afternoon Dr. Kay provided Dr. E. A. Watkinson with a review of the problem and a report of the morning proceedings.

Dr. W. Watkinson

KK/MV.

Kingsley Kay.
