

December 17, 1951.

Mr. McCree,
Mineral Dressing and Process Metallurgy Division,
Department of Mines and Technical Surveys,
562 Booth Street,
Ottawa.

Dear Mr. McCree:

Enclosed are three sample bags of the type we used in collecting grass samples in Yellowknife. You will probably recall that in our telephone conversation last week, you suggested it might be a good idea to run arsenic blanks on these.

Unfortunately, these are the only bags I have. If you would like more I can write to Yellowknife and ask them to send us some.

Yours very truly,

J.P. Windish
J.P. Windish,
Industrial Hygienist.
