OTTAWA, 20 November, 1953.

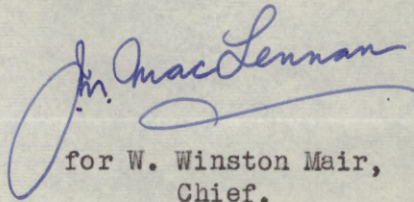

Dr. K. Kay,
Occupational Health Laboratory,
Department of National Health and Welfare,
200 Kent St.,
Ottawa, Ontario.

Dear Sir,

The Canadian Wildlife Service is at present making a study of the effects of industrial and other pollution on wildlife throughout Canada.

We understand that you possess information, which would be valuable for our purpose, on the effects of arsenic discharged from roast stacks by the gold mines in the Yellowknife area in the Northwest Territories. Would it be possible for you to let us have copies of reports on that subject, or summaries of references in the reports to the effects of the arsenic on mammals, birds and fish in the area?

Yours truly,

for W. Winston Mair,
Chief.
