

C455-10-13

Jackson Building,
Ottawa, Ontario,
February 13, 1952.

Dr. O. L. Stanton,
Chief Health Officer,
YELLOWKNIFE,
Northwest Territories.

Dear Dr. Stanton:

The Lab. has asked me to drop you a note regarding the Yellowknife samples.

A consignment of these arrived early in January presumably representing the December batch, but to date no further samples have arrived and we would be greatly obliged if you could contact Mr. Lecuyer, the Janitor, and ask that these be sent on as soon as possible and that he try to keep as near as possible to the monthly samples as agreed.

If you should happen to see Mr. Parker, I would be personally obliged if you would remind him, that to date, he has not answered my last two letters, and I am wondering if he is unwell and unable to reply by reason of illness. I would greatly appreciate an early reply from him.

All the best, kindest regards,

Yours very sincerely,

D. L. Henderson, M.B., Ch.B., D.P.H.
Industrial Health Division.
