

Mr. J. P. Windish,  
Industrial Hygienist.

455-10-13

Chief, Industrial Health Laboratory.

November 17, 1951.

Addendum to Environmental Sampling Directions -  
Yellowknife Survey.

- (1) Kindly make enquiries of the Wild Life representative with regard to observations on injury to wild life in the area. If it is considered desirable, a few samples of wild life might be shipped down for analysis, particularly examples which are used for human consumption.
- (2) I would suggest that you secure approximately 20 samples of ice at locations where it is necessary to chop holes to collect water samples.
- (3) Notify me by letter of sample numbers shipped. I will contact the recipients and ensure that damaged samples can be repeated.
- (4) If you assign new numbers, advise by letter giving information as to location and description so that this may be added to the book here.
