Ottawa, Ontario.

June 21st, 1954.

Mr. S. Homulos,
Mining Inspector,
Yellowknife, N. W. T.

Dear Steve:

Jerry Dowd and I shall arrive in Yellowknife on
July 1st.

In addition to collecting our usual water and grass
samples we intend to take air samples in the roaster plants and
Cottrell building with the electrostatic sampler you have, and
to take stack samples at both mines. We will bring along a supply
of sampling tubes for the e.s.p.

Will you please buy two dozen quart sealers for me and
have them at your office? I'll pay you for them out of petty cash.

Regards.

Yours very truly,

J. P. Windish.
