January 27th, 1954.

Arsenic in Yellowknife Air Samples

Please refer to letter of January 16/54 from Mr. Homulos to Mr. Windish.

The arsenic in each sample in micrograms of arsenic (As) per cubic metre is as follows:

No. 1	6.7
No. 2	19.3
No. 3	1.8

As the M.A.C. for arsenic for 1953 is 500 micrograms per cubic metre these are well below the limit.

J. L. Monkman.
