Statistical Analysis - Yellowknife.

Some time ago I passed the data on intake of patients in Yellowknife Hospital for 1952, to Miss B. Stewart. This data completes that required for a five year analysis and when added to that already in our possession should prove very interesting.

I understand Miss Stewart is extremely busy but if this statistical analysis, similar to that which you have already done for for us, could be completed before Christmas, I would be greatly obliged.

D. L. Henderson, M.B., D.P.H.,
