

MEMORANDUM

TO: S. McAlpine
CC: K. Blower
FROM: K. Morton
DATE: January 30, 1989
SUBJECT: HI-TEMP FILTER, PLANT VISIT

I received a call from Barry McLeod of Hipower Systems on Friday. Apparently Pall are having some difficulties in arranging a plant visit but they are still working on it.

They have offered to send one of their people to make a presentation to the directors, if this would be of any use.

Ross Gilders of RPC sent the attached memo re. the Mott filter installation in Colorado. It looks like the possibility of visiting this plant is quite remote. Discussions with Mott are continuing and they may come up with something else.

K. Morton
