Kent, I've measured the cabinet and have made allowances for alien, gas bottles and desk. The room design shown above would require interior measurement of 7'9" x 13'8". I wasn't able to measure the compressor room yesterday, so I'm not sure if this <sup>design</sup> will fit. Height to ceiling should probably be around 9 feet. No need for insulation, I would think. (?)

We should plan for ventilation, such as an extractor fan and duct. I guess we <sup>(Robt)</sup> will look after power and light. Please let me know if you have comments on room design/size.
