✓ *Joe MANKO*

Dear Norm:

I am writing today in regards to a piece of equipment the Giant mine purchased from Pall Canada back in the early 1980's. Although I have been unable to track down the exact date of purchase and I do realize this was a number of years ago I am hoping you might be able to help me.

The item in question is a compressed air dryer Model # 25HA4, Serial # D-156-80. C0134

What I am hoping you could do is find a manual for this with the specs of exactly what it does, as I am not sure if this model is still made or sold or is obsolete! We are in the process of trying to set up a sulphur dioxide monitoring system and it requires clean, compressed air in one of the instruments. This 'dryer' was apparently used only for a brief time and has not been in use for a while. We are wondering if it might be suitable for use in the SO2 system.

Hopefully you might have something on file or in the archives that will help me out.

I can be reached in the office at 867-669-3754 or faxed at 867-873-8983.

Regards,

Monica Bernard
