

Arsenic Purification Pilot Plant

201
Feb 28/79

Flow $\frac{1}{4} = \frac{1}{2}$ I.G.P.M.

Feed 0.12 to 0.35 lbs solids/min
depending on recommended As_2O_3

Notes

1. All Tanks are drums with plastic bag liners
2. Piping - plastic pipe or hose
3. Cooling coil - smooth stainless or plastic tubing easily removed for cleaning
4. Filter - laboratory pressure filter with fine screen or coarse cloth. Should have samples of several size grades of filter and available - need 2 or 3 units to allow clean & precoat without interrupting flow
