Minutes of Meeting with Con
Re: Arsenic Dust Treatment
February 21, 1979

Present: D. MacPhail, J. Gowans, K. Morton, W. Moore

Anxious to have Giant treat their arsenic sludge.
Need assistance to make presentation to Water Board - as soon as convenient.
Harry Jackson, Trail, their consultant.

Timing - when do we start - construction?

Best to deal directly with Water board - Warner and Company.

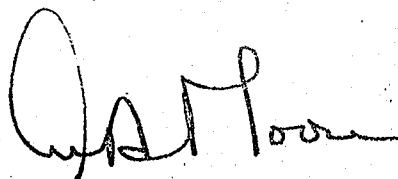

Con would prefer to meet with Lynn Price & their Jackson in Yellowknife.
Design of plant.

After I return from Toronto, Dave & I will draft a joint letter to the Water Board advising them that we are seriously considering this treatment process.

Things to Do

1. Presentation to Water Board.
2. Test work on gold recovery.
3. Finalize plant design - capacity - to treat more of Con's product.
4. Con wants to help on transportation of this stuff.
5. Joint letter to Water Board prior to March 8th.

(Note: Should have a sump in kiln building to hold entire contents of a tank or tanks.)

W. A. Moore
