

Phone Call from W.A. Moore

Mem 4179

re pilot plant.

Advised that he has received a letter from the Water Board stating their concern about our ability to meet the guidelines.

Final report is due May 1, 1980

Final compliance due May 1, 1980

Further letter states that if regulations not met by May 1, 1981 - then will take legal action.

Moore feels in view of above - we cannot leave the Council's best out of pilot plant considerations.

I told him to let people meeting in Toronto today know about this so it could be discussed.
