

Stack Tests

MEMORANDUM

To D.T. EMERY

Date June 5/73

From A.K. CAMPBELL

Ref. _____

Subject Amenic Stack Tests

- ① Howard Chambers of Environment Protection Service called at 11:00 a.m. The study on air pollution which commenced in March has been completed, but results are not available yet. However, the monitors will be left in present locations in the event that further follow-up sampling is required.
- ② The Environment Protection people in Edmonton have requested that a representative of the Department be present as an observer during the next Stack Sampling at Giant. If possible they would like to have the approximate date of next Stack test a few days in advance so that Edmonton could be advised, and a representation sent to YK.
- ③ Informed Chambers that last test was on May 18 and tests were normally done once a month during summer. I told him that I would discuss matter with you, and would call him later. He is responsible to Sandy Lewis & his phone number is 873-5831.
- ④ Have not been able to reach H.E.P. but at present cannot see any objection to rep. being present.
