Subject: Your File 3425

Attention: Mr. H. Paskall

Dear Sir:

I had occasion to show your report regarding Giant's stack test to J.A. Lemon, Chief of the Air Pollution Control Directorate, EPS, Abatement and Compliance Branch in Ottawa. He was quite concerned over the fact that the appendix on Methods and Procedures was all too brief. He claims that at least twenty pages of detailed procedure are essential to satisfy his people as to whether the correct procedures are being followed. He maintains that this type of report may satisfy authorities in Alberta but would never get past the Federals. When I pointed out that your firm was one of the ones recommended by EPS personnel, he replied that Western would be checked out more thoroughly.

I am afraid that I was in no position to argue but it appears he is not too happy. Thus, if he will not accept this type of report, Giant cannot.

I would be pleased to have your comments.

Yours truly,

GIANT YELLOWKNIFE MINES LIMITED
