Mr. K. Morton
Mill Superintendent
Giant Yellowknife Mines Ltd.
YELLOWKNIFE, N.W.T.

4221-70/Y24

Dear Mr. Morton:

The Environmental Protection Service, Northwest Regional office in Edmonton, requests permission to perform a stack emission survey at Giant Yellowknife Mines commencing on July 10, 1978 and proceeding to July 15, 1978. Tests will be performed according to the proposed Federal Standard Reference Method for Source Testing:

Measurement of Arsenic Emissions from Gold Roasting Operations, on the main roaster stack. All equipment and manpower will be supplied by our department. The proposed sampling program was discussed over the telephone with Mr. Larry Connell of your department and he had expressed some interest of performing some collaborative testing using your test equipment at or near the same time. We would be prepared to discuss this possibility with you further.

Thankyou.

Yours truly

Ray Capowski
Project Engineer
Air Pollution Control Section
