MEMORANDUM

TO: Kent Morton
CC: N. Figgess, Fenco
FROM: Ken Blower
SUBJECT: LETTER FROM HY POWER - BARRY MCLEOD - 24 JAN. 89
DATE: February 8, 1989

In his letter to you on page 1, Item (2), he makes reference to the pilot plant setup and indicates that Giant Yellowknife would "...purchase filter elements and the necessary equipment...."

Our discussions, as I recall them, were that Pall Corp. would provide the filters for the pilot plant tests (after inspection of the facility by Tore Lindstrom of Pall) as this step is necessary for Pall to engineer the ultimate production units.

It is important to clarify this point at an early date so that we know where we stand. Could you please give me your comments?

Ken Blower
