

## MEMORANDUM

TO: S. McAlpine  
CC: K. Blower  
FROM: K. Morton  
DATE: Jan 22, 1990  
SUBJECT: HI-TEMP GAS FILTRATION, CANMET GRANT

---

CANMET's Approval Committee has tentatively awarded Giant a \$75,000 grant to complete hi temp filtration tests related to WAROX production. The funds will be made available in two stages, \$30,000 to be spent in this fiscal year (by March 31), and \$45,000 to be spent next fiscal year.

One of the conditions of receiving the grant is that Giant contribute at least 25% of the total spent on the project. This amounts to \$25,000 over the life of the \$100,000 project. If the distribution is similar to that of CANMET's contribution, Giant will be required to spend \$10,000 during this fiscal year and \$15,000 during next fiscal year.

In Giant's application for funding under this program, it was estimated that Giant's contribution would be \$10,000 cash and \$15,000 labour. This is only a rough estimate and it is likely that Giant's costs could be almost entirely comprised of salary and administration costs, with allowance for one visit to RPC during the testing.

I must send CANMET a detailed statement of work and timetable for work to be done in each fiscal year, and they need this information by tomorrow. Do I have approval to proceed?
