Subject: Giant Yellowknife's As₂O₃

Date: December 28, 1978

INTER-OFFICE MEMORANDUM

From: P. J. Hanink

Copies to: R.J. Raleigh, D. Emery, T.J. Desanti

The quoted rate for direct truck services from the mine to Connely, Ga. is U.S. \$11.00/cwt. The estimated rates to:

Salt Lake City, Utah would be U.S. \$6.00/cwt
Buffalo, N.Y. would be U.S. \$9.50/cwt
at minimum weight of 48,000 lbs.

There could be possible movement of trailers by piggy back from Hay River, Alberta to Connely, Ga. (Atlanta). The material could be placed in a bulk container liner or bagged. The estimated rate would be \$8.55/cwt minimum weight 80,000 lbs. (2 trailers). Transportation from Hay River to the mine would be additional and arranged with a local carrier.

The truck rates quoted are predicated on a number of considerations, one being a long term contract (5 years of service) and the other being overcoming the numerous difficulties presently being experienced handling Campbell Red Lakes As₂O₃.

Apparently the material takes several days to load and one week to unload despite modifications to the trailer in use. Perhaps Tacoma could lend some expertise to this situation.

Colette Doyle
