

Royal Oak Mines Inc.

Memorandum

To: Steve Schultz, Environmental Superintendent
From: Richard Allan, Manager - Mining Projects
Date: April 22nd, 1998
Subject: The Deloro Mine

Attached is a copy of the information I received from MNDM in Ontario regarding the Deloro Mine, a former gold (arsenopyrite hosted) producer.

They obviously did not store any arsenic trioxide wastes underground, but the mine and plant does have a colorful history.

I have included a copy for Neil Thompson, if you could get it to him, at your convenience.

I am awaiting material on the mine in Duparquet.

Rick
